

Indian Meal Plans

Vegetarian High-Protein Day (~2200 kcal)

Meal	Items
Breakfast	2 besan/moong dal chilla + 1 cup curd + 1 fruit
Mid-Morning	Handful of roasted chana or almonds
Lunch	2 roti + 1 cup rajma/chole + 1 cup rice + salad
Evening	Paneer bhurji (100g paneer) + green tea
Dinner	2 roti + dal (1 cup) + mixed vegetable sabzi + curd

Non-Vegetarian High-Protein Day (~2300 kcal)

Meal	Items
Breakfast	3 egg whites + 1 whole egg omelette + 2 multigrain toast
Mid-Morning	1 fruit + 10 almonds
Lunch	150g grilled chicken breast + 1 cup rice + dal + salad
Evening	Sprouts chaat + buttermilk
Dinner	150g fish or chicken curry (light oil) + 2 roti + sabzi

Fat-Loss Focused Indian Thali (~1700 kcal)

Meal	Items
Breakfast	Vegetable oats or poha with peanuts + 1 boiled egg
Lunch	1-2 roti + dal + large salad + 1/2 cup rice
Evening	Sprouts or roasted makhana
Dinner	Grilled paneer/chicken + sauteed vegetables, minimal rice/roti

Notes on Indian Cooking for Fitness Goals

Favor cooking methods like grilling, steaming, and light sauteing over deep frying to control calorie density.

Dal, paneer, curd, and legumes are strong vegetarian protein sources; pairing dal with rice provides a fairly complete amino acid profile.

Ghee and oil add up quickly in calories (about 45 kcal per teaspoon) - measuring rather than free-pouring helps with calorie tracking.

Roti (whole wheat) generally has more fiber than white rice; both can fit a plan depending on total carbohydrate targets.
